Zurich
November 2024

Valued patron,

we are delighted to inform you that the
Swiss Glioma Foundation was established in
Zurich/ Switzerland in November 2024.

Purpose

Its founding history is characterised by personal commitment and the will to tackle research and treatment for patients facing a brain tumor diagnosis.

Dr Christoph M. Woernle, a neurosurgeon and founder of this foundation, has personal experience of losing a loved one to this disease, but also professional and scientific experience in this field. This has motivated him to create a place of support and hope for patients affected by gliomas.

Commitment

The **Swiss Glioma Foundation** is primarily involved in the following areas:

Research funding

We support groundbreaking research to develop new treatment approaches and improve treatment options and chances of recovery for patients. At the same time, we are creating a network for young scientists through contacts with experts in the field of glioma research.

Education

We advocate for widespread brain tumor education to raise awareness and enable early intervention.

Vision

In addition to our activities, we support events that provide a platform for experts, patients and interested parties to exchange ideas. These events serve to share knowledge and present new research results.

We would be delighted to count you among our supporters.

For further information, please do not hesitate to contact us at:
